

SHADE TENT

Please Note: The Shade Tent is an accessory to your ChildLife play system. Use these instructions in conjunction with the Owner's Manual (containing safety, maintenance, and assembly instructions) of your play system. If you do not have your Owner's Manual, please call ChildLife at (800) 467-9464 or (508) 429-4639 for a free replacement copy .

Step 1) ASSEMBLE PLAY SYSTEM

Before installing your Shade Tent, assemble, install, and test your play system in accordance with the Owner's Manual that came with the play system.

Step 2) INVENTORY YOUR BOXES

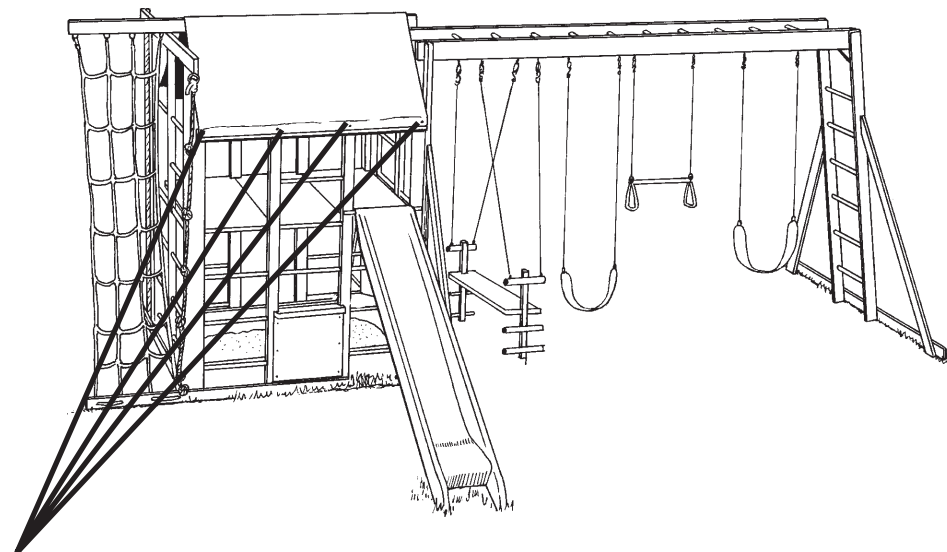

The Shade Tent comes in one box marked #41.

Step 3) INSTALL THE SHADE TENT.

Note: Always try to install your Shade Tent as straight and taut as possible. Not only will this result in a neat and trim appearance, but the tent fabric will wear better if it is tight. We regret that fabric wear due to loose tent installation is not covered under warranty.

Center the tent over the 91" Crossarm on your play system so that an equal amount of tent material overhangs each Notched Crossarm. Start on one side, and mark the location of each of the four snap studs to be installed by tapping the head of the snap backs VERY gently with a hammer. This will leave a small identifying mark in the wood.

Make a small pilot hole at the marked locations and install the four snap studs with a phillips head screwdriver. Screw the snap studs in until the base is flush with the wood. Fasten the snap backs that are in the tent to the snap studs. Move to the other side of your play system and repeat this step to install the other four snap studs. Remember to install the tent so it is as straight and taut as possible.

Install the four snap studs here, and in the corresponding locations on the other side of the play system.

Shade Tent
