free copy of the Assembly Instructions.

*Thank you for choosing a fine **ChildLife®** brand play system!*

# FIREMAN'S Gym® Sandbox

- 1) Inventory the parts.** The Sandbox comes in one box marked #76. Refer to the Box Packing List on the reverse.
- 2) Level the ground** under the Fireman's Gym so that the Sandbox will sit firmly on the ground. This will prevent sand from running out beneath the edges of the Sandbox.
- 3) Install Sides and Ends.** See **Illustration 1**. Place Sides and Ends loosely within the Fireman's Gym. Bottom of parts must be flush with bottom of Gym Uprights. Center so pre-drilled holes are on center with Uprights. Counter-bores must face into sandbox. Brass **ChildLife** labels must be right side up and face out. Screw Sides and Ends to Gym Uprights with (10) 2-1/2" #12 wood screws supplied. To eliminate scraping hazards, install screws completely so the head of the screw is below the surface of the wood.
- 4) Install Corner Seats.** See **Illustration 2**. Place Corner Seats (**smooth side down**) so edges are flush with sandbox edges. Fasten each Corner Seat with (4) 1-1/2" Stainless Steel Screws supplied. To eliminate scraping hazards, install screws completely so the head of the screw is below the surface of the wood.
- 5) Fill with play sand.** Play sand is available at most home improvement centers. To fill the sandbox 6" deep will require 7-1/2 cubic feet of sand.
